

# Mr. Softener™

WATER FILTRATION SYSTEMS

water is precious.....  
we treat with care !

Mr. Softener Water filtration system has a unique scale prevention system to eliminate hardware effects from the water supply in the range of Domestic, Commercial and Industrial Segments."

# LIMESCALE & CORROSION

## How Hard Water

effects your home and health ?

- ▶ **Pipes** can become clogged with scale that reduces water flow and ultimately requires pipe replacement.
- ▶ **Shower Heads** are blocked with lime scale.
- ▶ **Hair** can turn rough, dry & Frizzy.
- ▶ **Clothes** wash in hard water often look dingy & feel harsh and scratchy
- ▶ **Unregulated Calcium and Manganese** Salts in the water can cause your skin dry and cause irritation.
- ▶ **Washing dishes** with hard water may cause spotting and filming on your crockery.
- ▶ **Soler Heating / Water Heating / Gysers** Often used for Heating Water is prone to limescale buildup, which can reduce the efficiency and increase the maintance.

## HARD WATER EFFECTS

Mr.Softener  
WATER FILTRATION SYSTEMS

Clogging  
Water flow reduction in pipes

Scaling on Pipes

Scaling on Shower heads

Scaling in Water Heaters

Skin Damage  
Irritation & dryness

Hair Damage  
Hair Fall & Split Ends

# SCLAE & CORROSION FREE

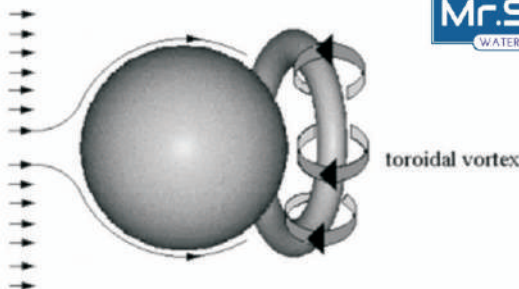

THE patented Ceramic Ball is made from all-natural minerals by a patented process. Heated to a temperature above 1550°C, each ball is extremely durable and possesses active energy properties. The Ceramic Minerals have the ability to generate Far Infrared Rays (FIR) and activate the water.

## Negative Ion Science

The Ceramic Ball Water Activator produces negative ions. Negative ions are known to help enhance the immune system, increase oxygen in the water, reduce toxins and help protect against the harmful effects of chlorine on the skin. The Ceramic Balls generate FIR. (Far Infrared Rays) FIR activates water and reduces the size of water clusters. Small water clusters absorb better and provide more benefits to the skin, hair.

Mr. Softner Water Conditioner is Multi vortex water Symphonizer. As water passes through system it is treated twice, first by multi vortex and then by ceramic balls which transform it into high quality soft water. No. chemicals are used in this mechanism.

## WORKING PRINCIPLE -1

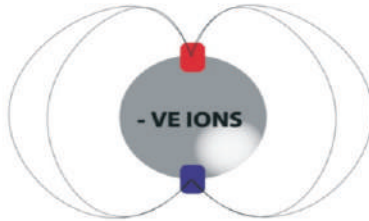

CREATED UNDER HIGH PRESSURE

## WORKING PRINCIPLE -2

Mr. Softener  
WATER FILTRATION SYSTEM

GAS DISCHARGE VISUALIZATION (GDV) + FAR INFRARED RAYS (FIR)
